## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-5, 10, 15, 22-25, drawn to wave energy converter, classified in class 290, subclass 43.
- II. Claims 6-9, 11-14, 16-21, drawn to a wave energy converter and method, classified in class 290, subclass 54.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as obtaining an optimum length of the shell by using the density of the mass within the shell, gravity, period of the wave (see claim 4). It is not required by an energy wave converter (invention II) to use such method and formula disclosed in invention I. Also, producing a voltage at the output of the generator and enhancing the generation of a resonant is not required by all WEC, as required by invention II. Moreover, invention I does not required calculating

the load by using the angular frequency of the waves, the period and the mass of the shell as it is required by invention II. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper and because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
